Autosteer Systems

The auto steer system is an advanced GPS-guided steering technology that automates a tractor’s steering, increasing agricultural efficiency and precision.

Farm Management System

The Farm Management System (FMS) seamlessly integrates auto steer systems and consolidates agricultural operation data.

Base Stations

Empower your precision agriculture products with highly dependable and precise RTK signals from our advanced base stations.

Accessories

Range of accessories designed to perfectly fit your FJD autosteering or guidance systems and enhance farm operations, significantly boosting efficiency and overall productivity.

FJD Z4210 Versatile Lawn Mower

FJD FR4000 Robotic Lawn Mower

FJD GM22 Electric Walk-behind Greens Mower

FJD RM21 Robotic Mower

FJDynamics RTK Auto Steering Kit

Using RTK technology FJ Dynamics auto steering kit has accuracy up to 2.5cm at an average speed of 0.5-20km/h. GNSS antennas paired with the sensor module give an ultra strong and stable signal which ensures high precision and reliability.

Currently available with both straight line and curved mode, upgrades are regularly released with new features,

these are installed remotely.

Fits a range of agri-machinery such as tractors, combines, sprayers etc. with different steering column attachments. The auto steering kit can be used for a wide range of farming operations such as spreading fertiliser, harrowing, overseeding, drilling, mowing etc.

AUTOSTEER

We're official U.K dealers for FJ Dynamics.

FJ DYNAMICS AUTOSTEERING KITS & EXTRAS

Why should I choose FJ Dynamics?

We are the U.K Official distributor of FJ Dynamics products. Therefore, if you are a U.K resident, you can purchase from us safe in the knowledge that we're fully trained and authorised to sell such products.

Refund and Cancellation Policy

Before agreeing to an order you should ensure you're fully familiar with the product and that it suits your requirements.

If you have any concerns or think you may not want to complete your order please let us know at your earliest convenience.

Are you an authorised dealer?

Yes! We are the official dealer for FJ Dynamics in the United Kingdom.

In 2021 we partnered with FJ Dynamics who are a worldwide company developing leading automation technologies across Agricultural, Construction, Commercial, Education & Hospitality sectors.

We are now chosen as the UK's main distributor for the FJ Dynamics Tractor Autosteer system and other products alike. With this development 'HFM SmartFarm' was adopted as a trading name and we began to specialise in

precision farming technologies.

Can I have a demo before buying?

That depends as we do hold some stock, but it's best to call us first to see if this is possible. If so, then you can come visit us in North Yorkshire, where we're located.

Precision Agriculture

Streamline Workflows

Maximise Yields

View All Products

Farming is at the mercy of the weather, but your operations can be streamlined for high yields with our FJD industry precision agriculture and landscaping solutions.

Automatic Mowers

FJD's smart mowers automatically mow your lawn with adjustable cutting height and blade speed, giving your lawn a professional look with centimetre-level accuracy.

Our mowers free up your valuable time for mission-critical tasks while leaving you a perfectly cut lawn to be proud of at the end of each mowing day.
